

VIVA

CHORD

61-key Arranger keyboard with LCD Display

English

User manual

INTRODUCTION

Thank you for choosing this keyboard from VIVA. This keyboard gives you the perfect opportunity to venture into the marvelous universe of music.

Information for users on the collection and disposal of old equipment

This symbol of products, packaging and/or accompanying documents indicates that used electrical and electronic products must not be disposed of with other household waste. Deliver old products to suitable collection points to ensure proper treatment, recovery and recycling under local legislation and Directive 2002/96/EC.

By properly disposing of these products, you are helping to save valuable resources and prevent any harmful effects on human health and the environment that might otherwise result from improper waste treatment.

For more information about collecting and recycling old products, contact your local authorities, municipal waste disposal authorities or the retailer where you purchased the product.

(For business users i EU)

Contact your dealer or supplier for more information if you wish to dispose of electrical and/or electronic equipment.

(Information on disposal in non-EU countries)

This symbol is only valid in the EU. Contact your local authority or dealer and ask for the correct disposal method.

SAFETY REQUIREMENTS

PLEASE READ THE INSTRUCTIONS BEFORE USING THE INSTRUMENT

Keep the user guide in a safe place for later use.

AC-adapter

Warning

- The AC adapter is designed exclusively for use with VIVA electronic instruments. Therefore, do not use it for other purposes.
- Only use indoors and non-humid environments

Caution

- Position the instrument for easy access to an electrical outlet. Should a problem or error occur, immediately turn off the instrument and remove the AC adapter from the socket. When the AC adapter is plugged in, small amounts of electricity are provided at all times, even if the power switch on the instrument is switched off. Therefore, always unplug if the device is not to be used for an extended period of time

Follow the safety instructions below to reduce the risk of injury or death due to electric shock, short circuit, injury, fire or other hazards.

- Do not place the power cord near heat sources or radiators. Avoid bending the cord too forcefully or otherwise damaging it by placing heavy objects on it, for example.
- The instrument must only be connected to the correct mains voltage.
- Use only the supplied adapter, otherwise it may result in damage to the instrument or overheating.
- Never place burning objects, such as candles, on the instrument, as these may tip over and cause fire.
- Always contact your dealer if the power cord is damaged or you notice unusual odours or smoke from the instrument. Or if you experience other problems with the instrument.

• The instrument cannot be serviced by the enduser. Therefore, do not open the instrument or otherwise attempt to change the interior parts. If the product is not working properly, contact your dealer or the location where you purchased the instrument immediately.

- Do not expose the instrument to rain and do not use it in or near damp or wet areas. Do not place liquid containers on the instrument. If liquid enters the instrument, immediately turn off the power and unplug the power.
- Never insert or remove the plug with wet hands.

1. USB MIDI connection
2. Sustain pedal connection
3. Headphone output
4. Microphone connection (additional accessories)
5. DC 9V Power connection

II. Pre-use preparation

Power supply requirements

1. Use with power supply:

Use the special power adapter that was packed with this keyboard. Insert the DC connector from the power adapter into the DC connector on the keyboard, and then plug the other end into the socket, and finally turn the keyboard on the power button .

Caution: When not using the keyboard, unplug the power supply from the power outlet.

2. Use with batteries:

Open the battery cover at the bottom of the keyboard and add 8 1.5V D batteries and make sure that the polarity of the batteries should correspond to + & - the direction of batteries marked under the battery cover. Attach the battery cover after installation.

Caution: Please replace all batteries at once when replacing the batteries. Do not use different kinds of batteries, and do not mix new and old batteries.

Remove the batteries to avoid possible damage due to battery leakage if you do not use the keyboard for a long time.

In/outs on the back

1. Connecting to USB to HOST - MIDI:

This keyboard can be connected directly to the PC, for use with midi. Connect a USB A-B cable to the keyboard USB to HOST and the other end to the USB port on your computer. You can now transfer midi information between keyboard and computer. You can play MIDI files from your computer on the keyboard and from the keyboard record midi via additional software on your computer.

2. Connecting microphone (additional accessories)

A microphone with a 3.5mm jack can be connected to the Microphone input at the back of the keyboard. You can also connect another sound source, such as a mobile phone.

Note: To avoid damaging the keyboard speakers, connect the sound source before turning on the keybar.

3. Using headphones: (additional accessories)

Plug the headphone jack into the [HEADPHONE] connector on the back of the keyboard

The internal speaker system on the keyboard is now automatically disconnected.

4. Sustain pedal.

Connect a sustain pedal (extra equipment) to the keyboard while the keyboard is turned off.

By stepping on the sustain pedal, you can extend the sound of the sound while the pedal has been stepped down.

III. Basic features

Basic operation

1. How to turn on the instrument

Press the [Power] button to turn on the keyboard (the power adapter is plugged into the power outlet or the batteries are installed correctly). Press the [Power] button again, to turn off.

2. Volume Adjustment

With the [Volume] dial, you can set the volume to suit your needs

LYD (Voice)

Audio selection:

This keyboard has 300 different sounds to choose (see audio overview)

1. Pressing the [VOICE] button activates audio selection and you can see the sound number at the top of the screen.
2. Now the different sounds can be selected with either the numeric keypad or with the [+/-] buttons in the same place.
3. Now you can play with the selected sound.

Effects

1. Dual voice

This keyboard has the Dual voice feature, which allows you to add two sounds to each other. This can give a larger and fuller sound.

1. By pressing the [Dual voice] button, audio number 2 turns on
2. Now the different sounds can be selected with either the numeric keypad or with the [+/-] buttons in the same place.
3. Now you can play with two sounds at the same time
4. By pressing the [Dual voice] button again, the Dual voice function is interrupted and you are returned to a single sound.

2. Sustain

Pressing the [Sustain] button activates manual sustain. Sustain can add an extension to the sound, which can make the tone effect of some sounds fuller and make it more vibrant to play. Pressing the [Sustain] button again turns off the Sustain function.

You can also use a sustain pedal, which can be connected on the back, instead. When the pedal is pressed, it is the equivalent of turning on the sustain and when you release, to turn off again.

3. Vibrato

By pressing the [Vibrato] button displayed "VIB" on the screen, there we now have vibrato effect on the sound if you play keys now. Press the power [vibrato] button again to end the vibrato effect.

4. Keyboard Split

If you press the [KEYBOARD SPLIT] button in normal mode, the keyboard keys are split into two parts. The sound selected before activating the [KEYBOARD SPLIT] button will be the one you can play with on the right side of the keyboard split and with the numeric keypad you now select the sound to be played on the left side of the split.

5. Tempo

By pressing the [Tempo +/-] buttons, you can adjust the tempo of the beat/accompaniment. The alignment area is between 30-240, the selected pace value appears on the screen when you make pace adjustment.

Pressing the [Tempo +/-] buttons at the same time restores the default value pace of the selected rhythm to 120.

6. Transpose

The tones of the entire keyboard can be raised or lowered by halftones by pressing Transpose +/- buttons. You can raise or lower ± 6 halftones. When the [Transpose] +/- buttons are pressed at the same time, the transpose's original value is restored 0. When the keyboard is turned on, the starting value is always 0

This function can be used, for example, if you are two playing together and you play the melody in two different keys, or if you can play a melody, but the tone is too high or low for you to sing, then you can change the tone up or down until it fits together.

7. Touch (Sensitivity)

The [TOUCH] button allows you to choose whether or not the keyboard should be touch-sensitive. If [TOUCH] is active, the tangent's sound level will change depending on whether you press hard or softly on the tangent, where against the sound level will be the same no matter how hard you press if [TOUCH] is off

8. Metronome

Pressing the [Metronome] button displays the metronome selection on the screen. You can select beat art to set the metronome's beat. Each time you press the Metronome button, the beat setting changes between 1/4 part - 1/2 part - 3/4 part or 4/4 part tact indication. For example, if you choose 3/4 part of the beat indication, the metronome will mark 1 battle for every 3 strokes, while in 4/4 it will mark 1 battle for every 4 strokes.

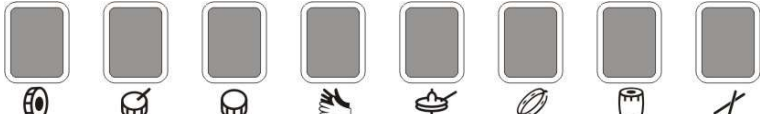

9. Panel Percussion

By pressing [Panel percussion], which are the 8 buttons with different illustrations below. Can you play percussion manually. The chart below shows what the sounds refer to

Panel percussion list

							
Big drum	Side battle	Small drum	Hand Clap	Crash Cymbal 1	Tambourine	High Timpani	Claves

10. Pitch bend

Pitch bend can add a smooth tone change up or down to the played tones in the right hand. To raise the tone, push the pitch bend wheel upwards with your left hand or reduce the tone by pulling the pitch bend wheel downwards with your left hand when playing keyboard with your right hand. An example might be that on a guitar sound you can make the same sound as when you "twist" the string on a real guitar, or that on a trumpet sound you can slide up on the tone as you can on a real trumpet.

Playing rhythm/accompaniment:

1. Choice of rhythm/accompaniment

The keyboard has 300 different rhythms/accompaniments that can be selected. (See Rhythm overview)

Pressing the [STYLE] button turns on the "rhythm" on the screen,

you can now choose the rhythm you need using the 0-9 numeric keypad or with [+/-].

2.Start/stop function

Pressing the [Start/Stop] button starts the beat and re-taps it.

3.Sync

Pressing the [Sync] button activates the "start sync accompaniment feature". This allows you to start rhythm/accompaniment with the first 19 keys, which are similar to the ones you take the chords in your left hand with. Pressing the [Sync] button will turn off again.

4.Intro/ending

If you press the [Intro/Ending] button before starting the beat, the keyboard plays an intro to the rhythm you have chosen. When the intro is finished, the rhythm usually continues. Pressing while the rhythm is playing will allow the keyboard to play a suitable finish to the beat before it stops. In this way, you get more the feeling of playing with an entire orchestra.

6.Adjust the volume of the accompaniment:

This keyboard has 9 sound levels for rhythm/accompaniment, which range from 00-08. When the keyboard is switched on, it is in the factory setting 07. By pressing Accompaniment volume "+" or "-" on the keyboard, either turn up or down the rhythm/accompaniment strength, respectively. If pressed "+" and "-" at the same time, the keyboard automatically reverts to factory setting 07.

Chord Accompaniment:

If you want to play with chords in your left hand, activate [Chord mode], where you can control the accompaniment with the keys on the left side

1. Single chord:

When you press the [SINGLE CHORD] button, you can control the accompaniment with the one-finger system.

2. Finger chord:

When you press the [finger chord] button you can control the accompaniment with the multi-finger system.

3. Pressing the [CHORD CLEAR] button disables the control of the accompaniment. The rhythm can still be played

4. Adjust the volume of the Rhythm:

This keyboard has 9 sound levels for rhythm, which goes from 00-08. When the keyboard is switched on, it is in the factory setting 07. By pressing Rhythm volume "+" or "-" on the keyboard, respectively, will either turn the rhythm up or down the strength. If pressed "+" and "-" at the same time, the keyboard automatically reverts to factory setting 07.

Record function:

1. By pressing the [record] button, the recording function is started. As soon as you press a tangent, the recording begins. The keyboard can record a maximum of 120 tones melody. When the maximum number of tones is reached, "FULL" appears on the screen

2. To listen to what you have recorded, press the [play] button

3. By pressing the [program] button, you can record/program your own rhythm, with the 8 Panel percussion buttons or with the keys. The recorded rhythm can contain 32 drum sounds. To listen, the beat can be played with the [PLAY] button. The tempo can be changed with the Tempo +/- buttons.

Note:

Each time you press either the [RECORD] button or the [PROGRAM] button, the previous melody or rhythm is deleted.

Demo one

By pressing the [Demo one] button, the "Song" on the screen, you can now select the melody you want using the numeric keypad 0-9, or with [+/-].

The keyboard has 40 pre-recorded tunes

Melody learning function

Pressing [One key teaching] or [Follow teaching] starts the teaching function. Select the desired melody on the numeric keypad or "+/-"

The function of [One key teaching]

With this feature, the keyboard does not detect whether you are playing right and wrong and continues to play the song, but you can practice and in principle play the melody with just one key.

The [Follow teaching] With this function, you must follow the tones in the display and play the correct tones/notes to automatically come the next tone.

11	Clapping song	25	A small brown bottle	39	Destiny
12	Fur Elise	26	Hawthorn		
13	Katyusha	27	River Of Babylon		

Fault finding

Error	Possible cause/solution
There is a little click in the speakers when you turn it on and off.	This is a perfectly normal phenomenon and has no effect on the product
The keyboard is on, but there is no sound in the keyboard when you press a tangent.	Check if the Master volume button is turned up. Check if there is a plug in the headphone output as it turns off the internal speakers
The sound distorts or the keyboard turns itself off.	Check that you are using the correct power supply that was supplied with the keyboard or if the keyboard is used with batteries, check if the batteries are running low.
When using the sustain button there are sounds that have long sustain (reverberation), while other sounds have a shorter sustain	This is perfectly normal as the manufacturer has set each sound with the best sustain length, with this feature
There is an imbalance between right-hand sound and accompaniment	Check that accompaniment volume is right in relation to master volume
When SYNC is enabled, the rhythm/accompaniment does not start	Check that either Single Chord or Finger Chord is selected and that it is the keys to the left of the split that are used to activate SYNC
The keyboard does not match with other instruments	Check that Transpose is in 00 or press Transpose+ and Transpose buttons at the same time
When you have your phone nearby, different sounds appear in the keyboard speakers	Mobile phones can interfere with the keyboard. To avoid noise, turn off the phone or put it further away from the keyboard.

Technical specifications

■Keyboard

- 61 keys standard keys with touch sensitivity

■Display

- Backlit LCD Display

■Sounds

- 300 Sounds

■Rhythm

- 300 rhythms with accompaniment

■Demo

- 40 melodies/demo

■Effect features

- Dual voice, sustain, vibrato, keyboard split, transpose, metronome, touch, pitch bend

■Recorder

- Record, play, program

■Percussion

- 8 different panel percussion sounds

■Accompaniment functions

- Start/stop, sync, intro/ending, tempo control

■Chord features

- Single finger, finger chord, chord clear, chord volume

•Melody function

- Demo one, one key teaching, follow teaching

■Other features

- Power/power, master volume, accompaniment volume

■External connections

- DC9V power input, microphone input, headphone output, sustain pedal, USB MIDI

■Intonation

- ≤5 cents

■Specifications

- 1008x431x171(mm)

■Net weight

5.14Kg

■Power supply

- DC9V 500mA

■Standby consumption

- 120mA

■ Included accessories

- Power supply, note rest, manual
